

NATURE-BASED EDUCATION CONSULTING

THIS SERVICE WAS CREATED TO HELP EDUCATORS AND PARENTS ON THEIR NATURE-BASED EDUCATION JOURNEY.

During a 2 hour visit on your educational site (or mine), we will discuss practical and philosophical means of implementing a play-based, outdoor learning experience for your school or home.

This doesn't necessarily mean creating a whole new outdoor curriculum or purchase of all new supplies and materials. I will help you find simple way of bringing nature into your learning space as manipulative, tools, and privations. I will introduce to you how to use the outdoors to teach math, science, literacy lessons, etc.

There is always a way to connect lessons to nature!

Consulting services are customized to your individual needs but may include:

Establishing a program philosophy, developing a nature-based curriculum or introducing concepts to an existing one, designing and enhancing natural play areas indoors and out, and evaluating program quality.

Home/Individual \$400

Education Center \$700

Includes on site visit (yours or mine), one full school calendar year of support, available to answer any questions and guide you in your first year of nature-based education.
